

Please use the link in the e-mail you received from our office, or you can go to our website and click on the patient portal button on the top right side of the page to create your patient portal account.

The screenshot shows a web browser window with the URL themidwifergroup.com. The browser's address bar and tabs are visible at the top. The website header features the logo for "THE MIDWIFE GROUP Women's Health & Birth Center" on the left, the phone number "(912) 629-6262" in the center, and a prominent blue button labeled "PATIENT PORTAL" on the right. A blue arrow points from the text above to this button. Below the header is a navigation menu with links for HOME, ABOUT, OUR SERVICES, BLOG, PATIENT FORMS, EDUCATION, EVENTS, VIRTUAL TOUR, and CONTACT US. The main content area displays a photograph of a single-story building with a covered entrance and green trim. Below the photo is a green banner with the text "COVID-19 GUIDELINES" in red. At the bottom of the page, a footer message reads: "Please READ important information about changes at our office and birth center - UPDATED JUNE 12, 2020".

Once you have created your account and are logged in, you should see a dashboard screen that looks like this:

The first part of the patient dashboard menu is the “MANAGE MY MEDICAL RECORD” MENU. If you want to send us any paperwork or anything that needs to be reviewed or added to your chart including your patient application package which includes demographic information, health history, and other important documents, it is important that you use the “Additional info shared with practice” button to upload those documents. Our patient portal is secure, while regular e-mail is not, and we want to insure that your information is protected.

The next part of the Dashboard menu as you scroll down, includes the CONTACT AND COMMUNICATIONS and REPORTS AND TOOLS sections:

These CONTACT AND COMMUNICATIONS section allows you to read secure messages we have sent you, you may message our office, or you can request an appointment.

REPORTS AND TOOLS allows you to perform other important actions including viewing recent test results and accessing your medical record.
