DEFINITION OF A WELL-CARE VISIT

The focus of a well-care visit is preventive care**. <u>If tests or services beyond the scope of a well-care visit are provided, then additional charges may be incurred for those services</u>**. The choice to address both well-care and medical issues may be offered during the same visit for convenience, if the provider's schedule will allow. This is up to your provider so that they may stay on schedule and keep other scheduled patients from waiting. Although our office will assist you with your insurance processing, it is the patient's responsibility to understand their insurance benefits.

What is a Well-Care Visit?	
YES	NO
A review of your current health and medical history	Treatment or consultation for a specific medical condition
Counseling about ways to improve your health	Any service not considered part of a well-care visit
A physical exam tailored to your preventive care needs	
Referral or performance of screening tests, if needed (billed separately by providers who perform the service)	

Your scheduled appointment day is for an Annual Exam which is a well-care visit. Each insurance company has different contracts regarding group and individual coverage for well-care (preventive care) benefits. We do not know your contract so we cannot tell you if your insurance company is going to cover the charge for a well exam. Insurance plans typically do not pay for this service twice in less than one year regardless of where you have it done. If there is any question about when your last well-woman exam was, please contact the office where you last had one to ensure you have been scheduled appropriately with us. If your last well-woman exam was at our office, we can find the date of your last exam for you. If tests or services beyond the scope of a well-care visit are provided, then you may be required to pay a co-pay and may incur additional charges.
